SIGNAL PROCESSING

Cumulative contents of Volume 55

Volume 55, No. 1, November 1996

Papers

R. Panda, G.S. Rath and B.N. Chatterji
Generalized B-spline signal processing 1
M. Di Bisceglie and M. Longo
Decentralized encoding of a remote source 15
F.P.S. Chin and C.C. Ko
Tracking of coherent broadband sources using adaptive directional filter with maximally flat responses at null directions 31
K. Ha and H.-M. Kim
A new phase determination method for non-minimum phase MA systems 55
J.S. Lim and C.K. Un
Block conjugate gradient algorithms for adaptive filtering 65
A.I. Al-Shoshan and L.F. Chaparro
Identification of non-minimum phase systems using evolutionary spectral theory 79
K.N. Plataniotis, D. Androutsos and A.N. Venetsanopoulos
Fuzzy adaptive filters for multichannel image processing 93
A. Gorokhov, Y. Abramovich and J.F. Böhme
Unified analysis of DOA estimation algorithms for covariance matrix transforms 107
F. Fan, I. Bruyland and W. Zhu
Analysis/synthesis filter banks designed for subband video compression 117
X. Descombes, M. Moctezuzma, H. Maître and J.-P. Rudant
Coastline detection by a Markovian segmentation on SAR images 123

Fast communications

P. Stoica and B. Ottersten
The evil of superefficiency 133
P.J.S.G. Ferreira
The existence and uniqueness of the minimum norm solution to certain linear and nonlinear problems 137

Volume 55, No. 2, December 1996

Papers

S. Tomažic
On short-time Fourier transform with single-sided exponential window 141
L. Deng and C. Rathinavelu
Construction of state-dependent dynamic parameters using the maximum likelihood approach: Application to speech recognition 149
F. Harroy and J.-L. Lacoume
Maximum likelihood estimators and Cramer–Rao bounds in source separation 167

Elsevier Science B.V.

P.K. Sadasivan and D. Narayana Dutt
SVD based technique for noise reduction in electroencephalographic signals 179
B. Lacaze
Stationary clock changes on stationary processes 191
I. Dologlou, D. van Ormondt and G. Carayannis
MRI scan time reduction through non-uniform sampling and SVD-based estimation 207
P. Lee and G.-S. Liu
An efficient algorithm for the 2-D discrete cosine transform 221
F. Gini
Estimation strategies in the presence of nuisance parameters 241

Fast communications

A. Saflekos, D. Tzovaras, S. Malassiotis and M.G. Strintzis
Coding of 3D moving medical data using a 3D warping technique 247
J.E. Dzielski, R.C. Burkhardt and M.E. Kotanchek
Comments on "Modified MUSIC algorithm for estimating DOA of signals" 253

Call for papers 255

Volume 55, No. 3, December 1996

Papers

Y.-L. Chen, K.-W. Tay and B.-S. Chen
Model-based filter banks and corresponding subband coding systems: Multirate state-space approach 257
F.M. Aparicio Acosta
On some chaos techniques and the modelling of nonlinear time series 269
M.H. El-Ayadi, E.K. Al-Hussaini and E.A. El-Hakeim
A combined redundancy averaging signal enhancement algorithm for adaptive beamforming in the presence of coherent signal and interferences 285
L.G. Weiss
Time-varying system characterization for wideband input signals 295
J.-J. Shyu, S.-C. Pei and Y.-C. Lin
Finite-wordlength design of 2-D FIR digital filters for sampling structure conversion 305
X. Shen and L. Deng
Decomposition solution of H_∞ filter gain in singularly perturbed systems 313
R.S. Holambe, A.K. Ray and T.K. Basu
Signal phase recovery using the bispectrum 321
J.-B. Lee and S.-D. Kim
A selective coding method based on global/local motion information 339
J. Spoelstra and E.C. Botha
New rotation-invariant features for radar target recognition 351

Fast communications

W.M.J. Coene and G.J. Keesman
On performance gains in MPEG-2 video coding via a rate-distortion optimal route 369
R. Van de Walle, I. Lemahieu, J. Peynsaert, Y. De Deene and E. Achten
Motion detection from the measured signals in magnetic resonance imaging 375

Acknowledgements 381
